

CCP MODULE 09

Cloud Security Lab

This course module presents participants with a series of exercises and problems that are designed to test their ability to apply their knowledge of topics covered previously in course modules 7 and 8. Completing this lab will help highlight areas that require further attention and will further prove hands-on proficiency in cloud computing security practices, mechanisms and architectural patterns as they are applied and combined to solve real-world problems.

As a hands-on lab, this course provides a set of detailed exercises that require participants to solve a number of inter-related problems, with the ultimate goal of evaluating, designing and correcting cloud security technology architectures to fulfill specific sets of solution and business automation requirements.

For instructor-led delivery of this lab course, the Certified Cloud Trainer works closely with participants to ensure that all exercises are carried out completely and accurately. Attendees can voluntarily have exercises reviewed and graded as part of the class completion.

For individual completion of this course as part of the Module 9 Study Kit, a number of supplements are provided to help participants carry out exercises with guidance and resource references.

Arcitura®
CERTIFIED
Cloud Security
Specialist

CERTIFICATION

This course is part of an accreditation curriculum through which one or more official certifications can be achieved.

EXAM C90.09

Exams are generally available at Pearson VUE testing centers worldwide, via Pearson VUE online proctoring and on-site delivery as part of private workshops.

STUDY KIT CONTENTS

This course is available as part of an Arcitura Study Kit that includes the contents listed below. In addition to the base course materials used during training workshops, additional materials designed for self-study purposes are also included.

- Lab Exercises Booklet
- Self-Study Guide
- Mind Map Poster
- Flashcards
- Audio Tutor Recording (usb)
