

Highlights

Certified Professional

Recognized as an expert in ForeScout CounterACT design and implementation.

Service Delivery

The FSCE is authorized to deliver services on behalf of ForeScout.

Training

The FSCE may also be eligible to deliver training on behalf of ForeScout.

Unprecedented access to CounterACT expertise

FSCEs have direct access to ForeScout's Architecture team; as well as community forums, labs, seminars, and our beta program.

FSCE Certification

At ForeScout, we recognize the critical need for highly trained engineers who can successfully deliver CounterACT™ capabilities in complex customer IT security environments. The FSCE is our highest level of certification. It validates that an engineer has the experience and expertise to successfully design and implement CounterACT solutions for our customers. FSCE certification is the final step in an educational process that includes the ForeScout Certified Administrator Course, successful completion of the written ForeScout, Certified Administrator exam, and extensive hands-on shadowing in real-world customer environments.

- **Certification Testing.** The FSCE certification test is an 8-hour hands-on practical exam. The test requires students to demonstrate an in-depth knowledge of CounterACT capabilities through the analysis, design, and implementation of a complex statement of work. The exam is proctored by an independent CounterACT expert to ensure all candidates meet the exacting standards required of an FSCE.
- **Certification Benefits.** FSCEs are authorized to perform delivery of professional services and training for CounterACT, CounterACT Edge and all other products sold by ForeScout Technologies. In addition, certification as an FSCE has the following additional benefits:
 - Opportunity for FSCE's organization to become a ForeScout Delivery Partner
 - Opportunity for FSCE's organization to become a ForeScout Authorized Trainer
 - Use of FSCE logos on business cards and apparel
 - Use of FSCE collateral on ForeScout Delivery Partner website and marketing literature
 - Access to ForeScout professional service architects
 - Exclusive access to the FSCE community forum
 - Extended CounterACT virtual licenses for lab use only
 - Access to CounterACT beta software for lab use only
 - Limited access to ForeScout lab environment based on availability
 - Access to new product release training
 - Discounts for ForeScout conferences and seminars
- **Certification Responsibilities.** FSCEs are required to maintain proficiency with all ForeScout Technologies product releases and features. In order to maintain a current level of knowledge of CounterACT, FSCEs must:
 - Perform a ForeScout professional services engagement at least once every six months
 - Attend new product release training within six months of release

FSCEs who do not maintain these standards may be required to interview with the Director of ForeScout Professional Services or an authorized representative to obtain written authorization to perform engagements as an FSCE.

FSCE Certification is limited to employees of authorized ForeScout resellers and service delivery partners.

About ForeScout

ForeScout enables organizations to continuously monitor and mitigate security exposures and cyber attacks. The company's CounterACT appliance dynamically identifies and evaluates network users, endpoints and applications to provide visibility, intelligence and policy-based mitigation of security problems. ForeScout's open ControlFabric™ architecture allows a broad range of IT security products and management systems to share information and automate remediation actions. Because ForeScout's solutions are easy to deploy, unobtrusive, extensible and scalable, as of January 1, 2015, they have been chosen by more than 1,800 of the world's most secure enterprises and government agencies in over 62 countries. Headquartered in Campbell, California, ForeScout offers its solutions through its global network of authorized partners.
